SOFTWARE DEVELOPER

Lizbeth Montero

EXPERIENCE

STUDENT JAN 2020
CENFOTEC UNIVERSITY. SAN JOSÉ, COSTA RICA .

During my 3 years at Cenfotec University, I gained experience in software engineering. I participated in academic projects where I worked in multidisciplinary teams, developing web applications and database systems.

I worked in all stages of the software development life cycle and used technologies such as HTML, CSS, JavaScript, JavaScript, HTML, CSS, JavaScript, JavaScript, JavaScript, JavaScript and JavaScript. Technologies such as HTML, CSS, JavaScript, Angular, Node.js, Java and SQL. I also acquired skills in the use of Git and in the design of robust and scalable solutions.

EDUCATION

SOFTWARE DEVELOPMENT TECNICIAN JAN 2020 - APR 2022
CENFOTEC UNIVERSITY. SAN JOSÉ, COSTA RICA .

BACHELOR OF SOFTWARE ENGINEERING JAN 2020 - PRESENT
CENFOTEC UNIVERSITY. SAN JOSÉ, COSTA RICA .

Expected graduation: April 2024

PROJECTS

Nft Marketplace

A web application was developed In the subject Project 2 at the Cenfotec University with the following technologies (.NET, Azure as a cloud system, SQL Server for data persistence).Some tools that were integrated were Sendgrid, Cloudinary, Twilio, and Paypal.The application consisted of a marketplace where the users could create their own NFTs, user also could put their NFTs on sale, in an auction, or receive offers from other users.

Study Buddy

A web application called "Study Buddy" was developed as part of the Proyecto3 course at Universidad Cenfotec, using the following technologies (MySQL as the database, Angular, Spring Boot, and JHipster).

The application consisted of a study platform where teachers and students could share knowledge. In addition, they could share relevant educational materials such as videos and PDF files, create study rooms, and communication channels. The purpose was to provide knowledge on different subjects to individuals interested in furthering their understanding in a particular area.
